# LEARNING MANAGEMENT SYSTEM

This system mainly deals with the improvement of the child's caliber in the academics. Most of the students who are below average in studies are struggling very hard to understand the concept of subject. Some students go for outside institutions giving a chunk of money to learn this subjects, some students will be facing this institutional tutors as an extra burden for them, some can't keep track on both simultaneously also in an year like pandemic it was nearly impossible for a tutor to run the classes. For overcome the drawbacks we're introducing a new system where we're providing an online platform for academic purposes mainly targeting below average students. We're not charging a high amount of fee. We provide them study materials in pdf format, videos related to each and every topics and even schedule online classes with experienced teachers. We also provide them self assessment tests, weekly and monthly and based on the results we will provide gift voucher. We also maintain proper communication with respective parents.

## Modules

1) User: The user is the one who wants to get the online platform services. He can register in the site. He will be assigned with respective classes and rest of services.
2) Parents: the parent of the respective user can register and the stats of the assessment of user is being sent to parents on weekly basis.
3) Teachers: the respective teachers can get the student needs and topics which he wants more training.
4) Admin: He is the in charge of the entire site. He can add students, schedule classes, communicate to teachers, communicate to parents, conduct tests, send results to parents and provide gift voucher to students
